

Finamac

The Finest Automated Machines

Ice Cream Display Counter Elegance

Model Elegance 12 Containers of 5,8 liters
or 16 Containers of 4,2 liters

Diagonal Exposure of Containers
Total Visibility of Ice-Cream

Advantages

- Increases your sales up to 30%, and provides elegance and beauty to your store. An essential piece of equipment to display quality products.
- The inclined position of the containers will allow anyone to see them from the distance, whether an adult or a child, differently from regular displays, that do not exhibit ice cream with such an inclination, 'hiding' the product. This is a great difference of this **exclusive Finamac product**.
- Special tempered glass enables the product to be clearly seen. Special glasses anti-fog.
- Internal cold and dry air curtain that keeps the temperature uniform prevents the formation of ice crystals. Regular displays offer a cold air curtain not suitable for the weather.
- Automatic and energy-saving defrost, through system for heat pump. For complete defrost, it is necessary to remove the ice cream containers and turn off the equipment at the end of the day.
- Internal lighting is located just above the displayed products. Even from the distance, the ice cream is eye-catching!
- Equipment provided with refrigeration capacity suitable for tropical-climate countries. Equivalent displays, especially those made for cold weather conditions, do not support high temperature and humidity conditions, such as those occurring at the seacoast. Air condenser, environment-friendly gas and super-dimensioned compressor.
- Extremely easy to clean inside, since the tank where the containers are placed can be completely removed. Equivalent displays have fixed tanks, making it difficult to clean. This is another exclusive Finamac advantage.
- Light and compact equipment, easy to transport, provided with lockable wheels.

Technical Data

Electrical Installation: 220 V, Monophase, 50/60Hz.

Consumption of electricity: 1,5 kW

Net Weight: 240 kg

Equipment Dimensions (LWH):

1053mm x 1170mm x 1351mm.
